## EXPERIENCE

### GenAI Full Stack Engineer

#### GenAIKit

Jan 2025 – Ongoing      Remote

- Packaged ML models into FastAPI services and deployed via Docker, reducing deployment time by 40%.
- Built a SQL Agent using LangChain to ingest DB/CSV/Excel, generate and run queries, enabling 60% faster data analysis for business users.

### Generative AI & web development intern

#### GenAIKit

Jan 2024 – Dec 2024      Remote

- Created resume-JD matcher with voice/text interview question generation.
- Delivered tools that saved 20+ hours weekly for recruitment teams.

## PROJECTS

### Project 1

#### HR Assistant: Resume Analyzer + Interview Bot

- Parsed resumes, matched to JDs, and generated multilingual voice/text interview questions.
- GitHub: [github.com/triple4t/Interview-Assistant](https://github.com/triple4t/Interview-Assistant)

### Project 2

#### LLM Finetuning – Legal Summarizer

- Fine-tuned Mistral 7B using LoRA on 10k+ legal documents; deployed via FastAPI and Gradio.

### Project 3

#### ML as a Service App

- Developed a full ML pipeline with task auto-detection, EDA, training, and evaluation using FastAPI + Streamlit.
- Used MLflow for model tracking and metrics logging across classification and regression tasks.
- Deployed ML API backend using FastAPI and optionally Django, with REST endpoints and database integration.

### Project 4

#### WhatsApp AI Bot

- Automated 40% of customer support with intelligent replies via WhatsApp integration.

## MOST PROUD OF

### MOST PROUD OF - GyaanHack YouTube Channel

Created GyaanHack, a channel that simplifies AI and Generative AI with hands-on, beginner-friendly content.

### MOST PROUD OF Ranked 3rd in College for Competitive Programming

Secured 3rd place in a college-wide competitive programming competition.

### Solved 298+ Problems on CodeChef with a Rating of 1338

Showcased proficiency in Data Structures and Algorithms (DSA) by solving nearly 300 problems on CodeChef.
